

ABOUT

Mathias Guille is a Senior Principal Product Manager at Oracle Cloud Infrastructure and former VP of Cloud Platform at Broadpeak, with over 14 years building and shipping large-scale streaming infrastructure. A French engineer based in the US, he brings a practitioner's perspective on how real media platforms are designed, operated, and monetized — from CDN and edge delivery to OTT/FAST economics and the product decisions behind major streaming services.

Guest lecturer: IMT Nord Europe (Télécom Lille) · Butler University · University of Notre Dame

Industry speaker: IBC Accelerator · BroadcastAsia · SVTA
